

LECTURES AT THE ENGINEERING DAYS 2022

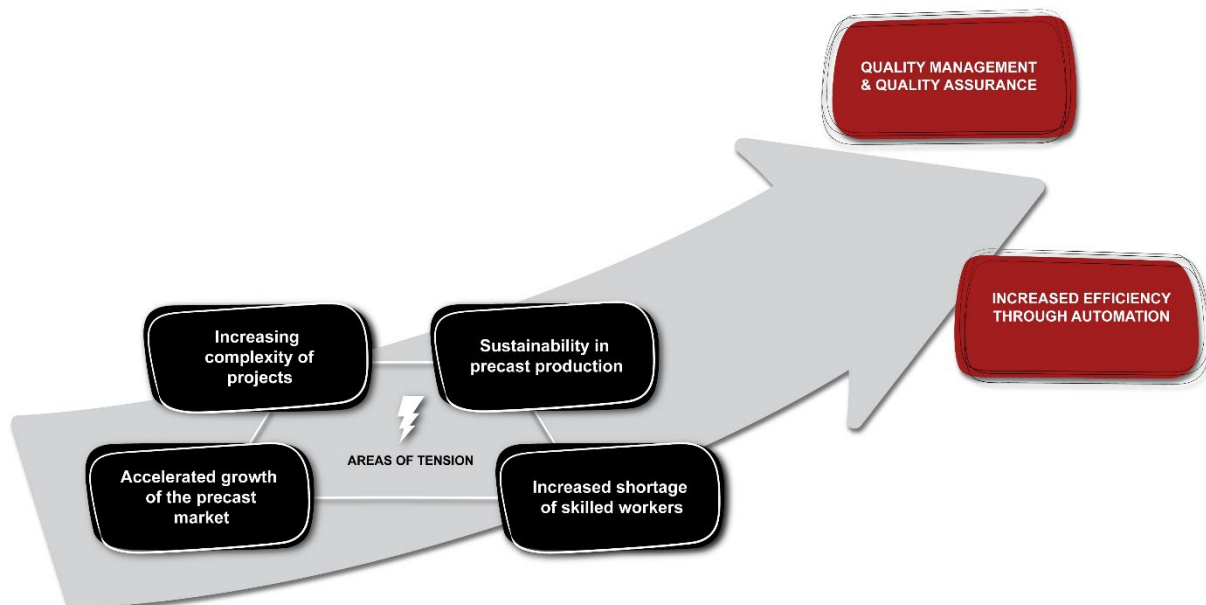

Dear Ladies and Gentlemen,

the Management Summit 2021 showed that there is an increasing need for discussion in our industry, to cope with current and future challenges. This experience, combined with the success of previous events, supports our decision: the Engineering Days 2022 will take place in the common way.

Therefore, we are already planning a professional, competent and innovative conference program. To develop the program we are currently looking for proposals matching the overall topic of:

– PREFABRICATION IN THE NEW REALITY –

Challenges in the tension area between labour shortage, industry growth, product complexity and sustainability

The following pages will provide all necessary information about lecturing at the Engineering Days. We are looking forward in receiving your proposal and are happy welcoming you at the Engineering Days 2022.

The conference aims to present current topics, trends, innovations, and solutions and encourage a lively discussion. Therefore, the main topic is divided in sub-topics in which the sessions will be clustered.

PROGRAM SUB-TOPICS OF ENGINEERING DAYS 2022:

- Recruiting & Training at the precast plant
- Sustainability in the precast production
- Remote Working & Collaboration
- Usage of modern IT-Technologies
- Modular construction & additive construction
- Software as a Service
- Planning & Execution of IT-projects
- Hybrid construction
- Quality management in the precast plant
- Best Practice of the BIM planning process
- Product innovations

In addition, feel free to suggest a not mentioned topic when proposing for a lecture.

DETAILS ABOUT LECTURING

Lecture	20 Minutes
<u>Language</u> + Translation	German English
<u>Deadlines for your Proposal</u>	
- Hand in	31. May 2022
- Selection by Organizer	30. June 2022
- Setting the program	July 2022
